Summary

Frontend-focused software engineer who builds React and TypeScript products, reusable UI foundations and the services behind them. I bring client projects from rough requirements through deployment and support, and I use coding agents with explicit scope and independent checks before a change ships.

Skills

- Frontend engineering: React, TypeScript, Next.js, shared UI conventions
- Full-stack delivery: Node.js, REST APIs, tRPC, PostgreSQL
- Cloud and operations: AWS, Docker, release checks, incident troubleshooting
- Agent-assisted engineering: task scoping, code review, test and deployment verification

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Build and operate client software and internal operations tools, from the React and TypeScript interface through APIs, data and support.
- Built a Next.js/PostgreSQL support platform connecting tickets, devices, contracts and billing within tenant-scoped access.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC operations for a hosting and colocation provider. Maintained PHP and JavaScript web services and replaced billing software.
- Built diagnostics for operators and customers and migrated workloads to Docker and Kubernetes.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built Node.js tooling to automate location and customer provisioning for a shared-office business.
- Designed a front-desk Wi-Fi support interface for password resets and troubleshooting while the routing layer handled customer separation.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported client networks, systems and endpoints as part of a managed-service team.

• Built recurring-issue diagnostics and worked directly with business owners and users to recover service.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Coordinated enterprise systems changes, access and incident escalations.

• Wrote Perl, Bash, VBA and PHP automation and built an internal backup tool used by executives and other staff to reduce licensing costs.

Selected Projects

Kerf | Frontend framework and app scaffold

Independent project · Early development

• Built a TypeScript/TSX framework and published its app scaffold. Designed component and routing conventions and gave the compiler actionable diagnostics for developers and agents.

NuPrice | Repricing and customer operations

Long-term client engagement

2019 - 2021

• Built and operated a marketplace repricing product, from customer-facing rules and analytics to integration workflows, subscriptions, billing and support.

ProofMark | Document preparation and signing

Completed client contribution

• Designed a React and Next.js signing workflow with PDF fields, recipient routing, verification and audit history. Kept fallback paths explicit for sensitive actions.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA A+ | CompTIA | Earned

CompTIA Network+ | CompTIA | Earned

Additional training: Anthropic, AWS, Udemy
